

Student/Faculty who has been in 'close contact' with COVID-19 patient or has symptoms (fever etc.)

8.18.2023 HUSM

Follow the flowchart below: If you are a Faculty or Employee, **report to your own affiliated department**. If you are a student, **report to Student Affairs Division and the person in charge of the class or clinical practice that you are going to miss**. Please follow their instructions (you do not need to report to University Health Administration Center). **If you have even a slight symptom of infection, please do not come to work or to classes without permission.**

Personnel who has symptoms (fever $\geq 37.3^{\circ}\text{C}$ #, soar throat, mild respiratory symptoms or cold symptoms, hard to breathe, loss of smell or taste, etc.)

Personnel who has been in 'close contact'* with a COVID-19 positive patient and has no symptom

Report to your supervisor and stay home. After more than half a day with the symptom, test yourself with antigen qualitative kit.

- If you are going to miss a class or clinical practice, you must report to the person in charge.
- If you have shortness of breath, early medical check-up is advised.
- **You do not need to report to University Health Administration Center**

Report to your supervisor and

- Take extra caution during the next 7 days since the last 'close contact'
- Keep measuring your body temperature both morning and night.
- Take standard precautions(mask, hand wash)
- When you develop a symptom, follow the left side

● If the test is Positive

- **Report to supervisor, and stay 5 days at home counting from day 0. Check your body temperature morning and night. If you pass day 5 and has no symptom for the last 24hrs, you can come to work or to class after reporting to your supervisor.**
 - Virus shedding period is 10 days, so keep taking standard precautions to avoid spreading the virus.
 - Student must get permission **beforehand** from the supervisor before coming back to clinical practice.
 - If the number of patients within the department increase rapidly, if the symptom is very strong, or if the symptoms remains and you are uneasy, contact Health Administration Center.

● If you do not have the kit or the test is negative

- Visit the clinic and take a test PCR/antigen quantitative test is preferred (please ask Health Administration Center if you have any question).
- **If you are negative for PCR or quantitative test**
 - **If you do not have fever above 37.3 for 24hrs and the symptom is relieved**, you may consider coming back to work after reporting to your supervisor.
 - **Contact University Health Administration if you have a good reason not to take the test.**
 - **If you are test positive, follow the left column.**
