

Student, Faculty who have 'close contact' with COVID-19 patient or has symptoms(fever etc.)

5.14.2020 HUSM

Follow the flowchart below, and please contact the "**Contact**" swiftly and properly

Personnel who have had 'close contact'** with person COVID-19 positive patient (even without symptom)

Have Symptoms (fever $\geq 37.3^{\circ}\text{C}^{\#}$, mild respiratory symptoms or cold symptoms for more than 4 days, hard to breathe, strong dullness or fatigue, loss of smell or taste, etc.)

Have traveled to **high risk areas(including Domestic)**, or have 'close contact' with person who have traveled **within 2 weeks**

- If you **have difficulty in breathing**, call '**Contact**'* immediately and ask for instructions
- For other mild symptoms, stay at home and report to above '**Contact**'*
- **Do not go to medical agency or clinic directly!** Contact Hamamatsu Public Healthcare Center* and University Health Administration Center to ask for instructions.
- **Report daily body temperature (morning and evening)** and physical condition to University Health Administration Center by **email every morning**

No instruction for PCR or negative in PCR testing

- **If 2 weeks has passed** and no symptoms, you can stop self-quarantine and self monitoring

Body temperature should be measured without taking any antipyretic

'Contact'*

1. University Health Administration Center
2. Student –Student Affair Division
Faculty, Employee-owned affiliated department and personnel division

Have not traveled to high risk areas and have had no 'close contact'

- If you have difficulty in breathing, call '**Contact**'* immediately and ask for instructions
- For other mild symptoms, stay at home, monitor **daily body temperature(morning and evening)**
- If needed, **contact in advance** and visit medical clinic
- If you have any symptoms mentioned above continuously, contact Hamamatsu Public Healthcare Center* and University Health Administration Center to ask for instructions.
- **You can come to work** if you do not have fever $\geq 37.3^{\circ}\text{C}$ for 24hrs. If any other symptoms is remaining, **please contact University Health Administration Center for advice**

** Definition of 'close contact'

- In contact without any masks on within a meter, over 15 minutes, or contact in closed spaces(living together, inside a car or airplane)
- Direct contact (medical exam., nursing, caregiving, etc.) to symptomatic patients or their body fluid/discharge (eg. sputum (sweat excluded)), without enough precaution against infection
